JOINT REPORT OF THE VICE-PRESIDENT AND THE DIRECTOR

CHARITY HOSPITAL OF LOUISIANA

At New Orleans

July 1, 1952

The Honorable Robert F. Kennon
The Governor of Louisiana

Ex-Officio President
Board of Administrators
Charity Hospital of Louisiana
New Orleans, Louisiana

Dear Sir:

The Vice President of the Board of Administrators and the Director of the Charity Hospital of Louisiana (at New Orleans) submit the following report of the activities of the hospital covering the period July 1, 1951 through June 30, 1952.

During the fiscal year, 287,396 patients were treated in the Admitting Rooms of this hospital, 103,899 patients were seen in its Accident Rooms, and 515,171 visits were made by 96,581 patients to the Clinics: from these three departments, 62,712 patients were admitted to hospital wards, spending a total of 808,540 days in the hospital. Of the patients admitted to the hospital, 20,056 were White and 42,656 were Negro. A total of 13,521 operations were performed and 11,360 deliveries accomplished. The overall mortality rate for the hospital was 4.01%. The volume of work done during the past year compares favorably with that done in years previous, and is a tribute to the loyalty and unselfish performance of duty by the smaller intern and resident staff which the hospital had. The interns numbered 99 and the resident staff, 199. The problems which these doctors had to face and the burdens which they carried were compounded by the shortage of nursing personnel which this hospital faced throughout the entire year. Through the unstinting efforts of the Visiting Staff, whose physician-members gave generously of their time, patients as well as resident and intern physicians benefitted.

The hospital buildings are in good condition, repairs and improvements having been made where necessary during the year.

The renovation of the Isolation Building (devoted exclusively to the care of infectious and contagious diseases) is nearing completion and will soon be ready for occupancy, providing an additional elevator, a modern diet kitchen (with a separate area for washing and sterilizing utensils), piped-oxygen to all areas, a new operating room in conjunction with the diphtheria ward for performing emergency tracheotomies and bronchoscopies, a ventilating system to prevent cross-currents of air from room to room, thus reducing cross-infection of patients, shatter-proof glass partitions between rooms on children's floor to permit thorough-vision for nurses, additional and adequate facilities for sterilization of equipment, and vastly improved treatment rooms, nurses stations and medication preparation areas. There was complete overhauling of plumbing to include installation of handwashing facilities in each room, and the building was completely electrically rewired. The

State Board of Liquidation granted \$75,000.00 and, at a Special Session, the Legislature approved \$175,000.00 for this project. The total cost for this work amounted to \$356,651.52.

During the past year, provisions were made in the Lapeyre-Miltenberger Building to house the new School of Physical Therapy, which is to open September 10, 1952, on the fifth floor. This is a new endeavor on the part of Charity Hospital in an effort to alleviate the shortage of physical therapists in this area. Dr. Nathan Polmer was appointed Director of this school, which was established through a fund of \$75,000.00 from the Legislature as a special appropriation.

The Milliken and Delgado Buildings were demolished during the past year after an agreement was made with Louisiana State University to exchange properties, whereby Charity Hospital received a tract of land on Gravier Street to be used as a parking area and the University received the Milliken and Delgado property for expansion of their Medical School.

The Eve Butterworth Dibert Memorial Building is now housing the interns of this hospital and helps to alleviate the congestion as far as housing facilities are concerned. This building, erected and furnished at a cost of \$487,945.48, was ready for occupancy at the beginning of this fiscal year.

The Thilborger property in Barataria is being used as a lodge for convalescent patients, and furniture and fishing equipment were provided for this purpose.

In the Main Building, the newly constructed Neuropsychiatric Unit on the third floor was opened for occupancy, providing more adequate facilities and offering private and semi-private rooms, four dining rooms, two solaria, psychological laboratories, expanded occupational therapy facilities, an expanded psychiatric social service department, observation rooms for more disturbed patients, hydrotherapy units, ample clothes closets and soft-colored walls. Two-thirds of the money used for this project was furnished by the U. S. Mental Health Department. In the Main Building, among other repairs and improvements, the Electroencephalographic Department was enlarged and moved to the fourth floor, and an additional machine was purchased. On the 14th floor, a lounge was provided for the female doctors, and furniture was placed in the lobby of the first floor. Orders have been placed for new Solution Room equipment for the Pharmacy on the 6th floor, as well as two-way radios ordered for the hospital ambulances. During the past year, approval was granted for the establishment of a School of Dental Hygiene here in the hospital to be operated by Loyola University.

During the past year, 3,646,368 meals were served by the Dietary Department in addition to 772,755 special diets served and 91,671 infant formulae prepared. 10,606,930 pieces (5,320,483 lbs.) were processed in our hospital laundry. Other interesting figures and more detailed information concerning all departments can be found in the following reports from the various department heads.

Respectfully submitted,

WILLIAM AUGUST WORNER
Vice President
Board of Administrators

ROBERT BERNHARD, M. D.
Director, Charity Hospital
of Louisiana at New Orleans

CHARITY HOSPITAL OF LOUISIANA AT NEW ORLEANS

COMMENTS ON OPERATIONS

Fiscal Year July 1, 1951 to June 30, 1952

Cost of operation for ordinary recurring expenses for the fiscal year ended June 30, 1952 compared with the previous year, increased \$215,636.75 or 2.67%, accounted for as follows:

	FISCAL YEAR		Increase	Percent Increase
	1951-1952	1950-1951		
Salaries	\$5,073,185.60	\$4,993,213.85	\$ 79,971.75	1.58%
Food	935,963.79	916,468.03	19,495.76	2.08%
Drugs and Surgical Supplies	1,175,896.68	1,068,967.85	106,928.83	9.09%
Other Operating Expenses	767,415.13	759,944.32	7,470.81	.97%
Repairs and Maintenance Expense	115,463.45	113,693.85	1,769.60	1.53%
	<u>\$8,067,924.65</u>	<u>\$7,852,287.90</u>	<u>\$215,636.75</u>	<u>2.67%</u>

During the fiscal year 129 additional employees were added to the payroll substantially contributing to the increase in personnel cost. At the end of the fiscal year, June 30, 1952, there were 2,947 employees on the payroll, not including 523 resident doctors, internes and students. We wish to call attention to the fact that 1,861 persons were employed and 1,732 released accounting for a labor turnover of 62.32%. Also there were 18,824 man-days lost due to illness.

The employees in the Maintenance and Engineering Departments were paid \$26,196.33 for overtime work during the fiscal year. The Maintenance Department labor cost was credited for the cost of labor furnished for the maintenance and alterations to endowed buildings, totaling \$10,464.10.

The cost of food consumed increased \$19,495.76 or 2.08% compared with the previous year. This increase may be considered normal due to slight increase in cost of all food consumed.

The cost of Drugs, Medical and Surgical Supplies used as compared with the previous year increased \$106,928.83 or 9.09% accounted for as follows:

	FISCAL YEAR		Increase	Percent Increase
	1951-1952	1950-1951		
Drugs	\$ 574,105.64	\$ 522,489.82	\$ 51,615.82	8.99%
Medical and Surgical Supplies	461,725.55	413,545.75	48,179.80	10.43%
X-Ray Films and Photographic Supplies	140,065.49	132,932.28	7,133.21	5.09%
	<u>\$1,175,896.68</u>	<u>\$1,068,967.85</u>	<u>\$106,928.83</u>	<u>9.09%</u>

The number of bed patients admitted during the year was 62,712. This compares with 63,525 patients admitted the previous year, a decrease of 813 patients. 603,788 patients were given treatment in the clinics compared with 627,834 the previous year, a decrease of 24,046 patients.

The average cost per patient day increased eighteen cents (.18) and the average cost of treatment of clinic patients increased nine cents (.09) as revealed from the following comparative statement.

	FISCAL YEAR			
	1951-1952	1950-1951	Increase	Decrease
In-Patient-days	808,540	803,918	4,622	
Average Cost per patient-day	\$8.98	\$9.16	.18	
Out-Patient-Visits	603,788	627,834		24,046
Average Cost per Patient-Visit	\$1.10	\$1.01	.09	

INVENTORY—MATERIAL AND SUPPLIES

	6-30-52	6-30-51	Increase	Decrease
Pharmaceuticals	\$ 76,522.10	\$ 79,214.10	\$	\$ 2,692.00
Food	8,986.31	29,206.81		20,220.50
Household Supplies	46,895.99	39,189.35	7,706.64	
Office & Multigraph Supplies	8,090.77	6,986.09	1,104.68	
Maintenance Materials & Supplies	60,259.18	53,672.47	6,586.71	
Medical and Surgical Supplies	70,606.98	65,942.76	4,664.22	
	<u>\$271,361.33</u>	<u>\$274,211.58</u>	<u>\$20,062.25</u>	<u>\$22,912.50</u>

As at the end of the fiscal year June 30, 1952, physical inventories were taken of all consumable materials and supplies and it was found necessary to adjust book inventories by increasing the book inventory of Maintenance Materials and Supplies by \$11,199.16 of which \$7,231.77 is an offset of a charge off as of June 30, 1951 of various dimensions of pipe of the Maintenance Department had failed to include in its inventory. Other inventory adjustments, in the aggregate, equaled \$43.71 credits to book inventories.

All materials and supplies were evaluated at cost.

PURCHASE ORDER COMMITMENTS OUTSTANDING

	6-30-52	6-30-51
Contractual Services	\$ 4,539.01	\$ 6,207.75
Materials and Supplies	52,207.28	70,329.92
Equipment	13,314.13	40,612.08
	<u>\$70,060.42</u>	<u>\$117,149.75</u>

CAPITAL EXPENDITURES

Expenditures for additional and replacement of worn out equipment out of "Operating Funds" amounted to \$148,880.63, as compared with \$110,410.17, expended during the previous year. Of the total of \$148,880.63 expended, \$50,350.00 represents the purchase of sectional

stand files installed in the Record Library. Equipment purchased and paid for during the year out of "Other Funds" amounted to \$55,770.20. See detail statement Schedule I-C.

COMPARATIVE STATEMENT OF SUNDRY REVENUES

Collections during the fiscal year for services rendered ineligible patients, fees, licenses and miscellaneous income amounted to \$181,100.86 as compared with \$175,512.78 the previous year, an increase of \$5,588.08, accounted for as follows.

	1951-52	1950-51	Increase	Decrease
Patient Services	\$ 83,586.94	\$ 76,587.30	\$6,999.64	\$
Licenses	25,068.50	23,920.50	1,148.00	
Fees	52,866.98	52,288.62	578.36	
Sundry	19,578.44	22,716.36		3,137.92
	<u>\$191,100.86</u>	<u>\$175,512.78</u>	<u>\$8,726.00</u>	<u>\$3,137.92</u>

By special Legislative Act of June, 1950, the hospital was granted permission to retain all collections of Sundry Revenues received up to June 30, 1952. In addition to the Sundry Revenues, the Hospital received \$227,534.68 Federal and other grants, compared with \$341,197.69 received the previous year, a reduction of \$113,663.01.

VISITOR'S FOOD SERVICE DEPARTMENT

The operation of the Food Store is financed by a separate Legislative appropriation of \$7,500.00 to be accounted for as a "Revolving Fund" and subject to be returned to the State Treasury should the food store at any time discontinue operation. The purpose of the food store is to furnish employees and patients an accommodation to purchase food, etc. at nominal cost.

Profits made during the year were \$8,966.04 as compared with \$7,692.75 the previous year, an increase of \$1,273.29. Up to June 30, 1952 we have an accumulated profit of \$26,424.58 which amount is subject to be transferred to the State General Fund.

ACCOUNTS RECEIVABLE

Miscellaneous accounts receivable of record June 30, 1952 viz \$10,001.41 are current and considered 100% collectable. The amount of \$28,848.16 due from the National Foundation for Infantile Paralysis, Inc. represents charges against Parish Chapters and is guaranteed by the Foundation.

During the year bills were rendered to ineligible patients treated in the hospital totaling \$143,774.81. Of the total accounts receivable outstanding at the beginning of the fiscal year and charges made during the year, collections received amounted to 32.91% of total billings.

EMPLOYEES RETIREMENT PLAN

During the fiscal year the hospitals' contribution to the Employees Retirement Plan amounted to \$269,734.77 as compared with \$239,336.90 the previous year, an increase of \$30,397.87.

ACCOUNTS PAYABLE—\$431,925.03

All obligations incurred and due by the hospital as of June 30, 1952 are current and accounted for and liabilities set-up therefor.

It has been the practice to discount all vendor's bills in accordance with the terms of purchase contracts. During the year cash discounts earned amounted to \$27,598.59. Two percent sales tax paid during the year amounted to \$44,333.84.

SCHOOL OF PHYSICAL THERAPY

On June 29, 1951, there was appropriated an amount of \$75,000.00 by the Legislature at its Special Session and identified as Act No. 24 for the establishment of a School of Physical Therapy in the Charity Hospital of Louisiana at New Orleans.

The fifth floor of the Lapeyre-Miltnerberger Building was renovated at a cost of \$8,360.06 for the establishment of the School. Total expenditures up to June 30, amounted to \$31,841.37 and purchase order commitments outstanding amounted to \$13,395.58, leaving an unencumbered balance of \$29,763.05, which amount will have to be returned to the State General Fund.

SURPLUS—JUNE 30, 1952—\$361,215.28

The surplus as of June 30, 1952 is accounted for as follows:

Inventory-Materials and Supplies	\$271,361.33
Purchase Orders Outstanding 6-30-1952.....	70,060.42
Prepaid Insurance	18,849.03
Deposits on Containers	944.50
	<u>\$361,215.28</u>

TRUST FUNDS

During the fiscal year various donations amounting to \$21,652.77 were received as follows:

Restricted to use	\$21,326.77
Unrestricted as to use	326.00
	<u>\$21,652.77</u>

Income received from investments of Trust Funds amounted to \$168,911.48 accounted to as follows:

	Restricted	Unrestricted	Total
Interest	\$17,463.28	\$53,899.30	\$ 71,362.58
Rent	20,762.00	9,569.95	30,331.95
Royalties		3,035.26	3,035.26
Leases	44,011.99	6,647.30	50,659.29
Dividends	497.00	13,025.40	13,522.40
	<u>\$82,734.27</u>	<u>\$86,177.21</u>	<u>\$168,911.48</u>

Expenditures out of Trust Funds during the year amounted to \$62,924.80, accounted to as follows:

	Restricted	Unrestricted	Total
Salaries	\$ 9,584.63	\$ 2,100.00	\$11,684.63
Indigent Patients Welfare	6,529.10	1,361.63	7,890.73
Repairs to Trust Fund Buildings	1,333.67	7,901.46	9,235.13
Sundry	2,159.19	18,236.74	20,395.93
Capital Expenditures	8,486.83	5,231.55	13,718.38
	<u>\$28,093.42</u>	<u>\$34,831.38</u>	<u>\$62,924.80</u>

MALE INTERNES HOME

In April, 1952, we received a check for \$41,843.40 representing the final payment from the U. S. Public Health Service's contribution for the construction of the Male Interne Building after formal inspection and acceptance of the building and furnishings therein by an agent of the U. S. Public Health Service.

The means of financing the construction and costs thereof was as follows:

FUNDS RECEIVED:

	Hospital Funds	Federal Funds	Total
Sale of Old Ambulance House	\$ 547.00	\$	\$ 547.00
Dibert Income Fund	174,209.99		174,209.99
Federal Grants		313,341.65	313,341.65
	<u>\$174,756.99</u>	<u>\$313,341.65</u>	<u>\$488,098.64</u>

EXPENDITURES:

Payment to George J. Glover, Contractor	\$429,530.77	\$	
Payment to F. C. Gondolfo, Surveyor	320.00		
Payment to Burns Furniture Co., Furnishings	27,890.57		
Payment to The Foster Co., Inc., Shades	467.00		
Payment to A. Perez and Associates—Arch.	29,890.30		488,098.64
Distribution of Cost—Building	458,340.75		
—Furniture	29,757.98		\$488,078.64

RENOVATION THIRD FLOOR, MAIN BLDG. FOR
NEUROPSYCHIATRIC UNIT

Based on an estimated cost of \$450,000.00 for the renovation of the Third Floor of the main hospital building for a Neuro-Psychiatric Unit in accordance with plans and specifications prepared by Freret and Wolf, Architects, the Federal Security Agency, U. S. Public Health Service made a grant of \$292,500.00 to the Charity Hospital equal to 65% of the total estimated cost.

The means of financing and expenditures to June 30, 1952 are as follows:

	Hospital Funds	Federal Funds	Total
Means of Financing	\$196,030.72	\$292,500.00	\$488,530.72

FUNDS RECEIVED TO JUNE 30, 1952:

Federal Grants		275,802.86	275,802.86
Hospital Operating Fund	100,000.00		100,000.00
Dibert Income Fund	111,620.00		111,620.00
	<u>\$211,620.00</u>	<u>\$275,802.86</u>	<u>\$487,422.86</u>

Additional Funds Receivable

June 30, 1952	15,589.28*	16,697.14	1,107.86
---------------------	------------	-----------	----------

	CONTRACTORS			Total
	Window Screens	Renovation	Architects	
Cost of Renovation	\$37,120.00	\$410,373.38	\$41,037.34	\$488,530.72
Payments made to June 30, 1952	37,120.00	408,373.38	40,175.36	485,668.74
Balance due on Contract 6-30-52		2,000.00	861.98	2,861.98

As soon as the balance due from Federal Grants, viz \$16,697.14, is received, the Dibert Income Account will be reimbursed \$14,481.42.

RENOVATION AND ALTERATIONS OF CONTAGIOUS PATIENTS' BUILDING

Contract was awarded to J. Gordon Lee on July 5, 1951 for the renovation and alteration of the Contagious Patients' Building in accordance with plans and specifications prepared by Herbert A. Benson and George J. Riehl, Architects.

The means of financing and expenditures to June 30, 1952 are as follows:

	Contractor	Architects	Total
Amount of Contract	\$302,937.00	\$30,293.70	\$333,230.70
Add:			
Change Orders approved by Board of Administrators	19,926.35	1,542.63	21,468.98
Change orders approved by Architects and not by Board of Administrators	944.60	944.60*	
Total amount of Contract 6-30-52	323,807.95	30,891.73	354,699.68
Payments made to June 30, 1952	272,246.34	18,176.20	290,422.54
Balance due on contract 6-30-52	\$ 51,561.61	\$12,715.53	\$ 64,277.14
Add:			
Other contractual commitments outstanding June 30, 1952 Montgomery Elevator Co.			4,309.00
Balance of funds on hand June 30, 1952			68,586.14
			54,470.03
Additional funds to be provided for			\$ 14,116.11

The following change orders were authorized by the architects but not approved by the Board of Administrators:

C. O. #1—Remove obstructions—elevator pit	\$1,084.12	
C. O. #2—Change in type of wiring	199.98	
C. O. #5—Repairs to waste in Shaft P-1	132.83	\$1,416.93

TRUST FUND INVESTMENTS—BONDS

At the end of the fiscal year, June 30, 1952, investments in Bonds, after amortization of Bond discounts and premiums, amounted to \$2,812,821.79, of which \$1,094,906.94 or 38.92% represents investments in State and Municipal Bonds and \$1,717,914.85 or 61.08% in U. S. Treasury Bonds.

BOND LIQUIDATION FUND

During the year \$277,000.00 of Bond obligations were retired and total interest on bonded indebtedness amounting to \$238,720.00 was paid. As authorized by the Board of Administrators, \$259,068.02 was transferred to the Hospital Operating Account. After setting up a reserve for bond retirement and interest on Bonds amounting to \$404,642.50 due in August and October, 1952, there remains an unencumbered balance of \$309,452.55 in the Bond Liquidation Account, of which \$24,879.29 is to be transferred to the Hospital Operating Fund to offset a deficit in the said fund as of June 30, 1952.

Respectfully submitted,

L. A. Millet
Secretary-Treasurer

* Denotes RED figure.

ANNUAL REPORT
of the
SISTERS' DIVISION
For the Fiscal Year July 1, 1951, to June 30, 1952
SISTER ANTONIA, DIRECTOR

The Annual Report of the Sisters' Division for the Fiscal Year Ending June 30, 1952 is hereby submitted;

The over-all planning, coordination, and control of the activities of the Nursing Department, the Schools of Nursing, both Professional and Practical, the Dietary Department, and the Housekeeping Department, all centered in the Sisters' Division, have functioned smoothly and satisfactorily during the past Fiscal year.

The Sisters' directing these departments will make a detailed report, so that this report will be brief and of a general nature.

In the month of May—1952 the Professional School of Nursing received temporary Accreditation from the National Nursing Accrediting Service, and were further advised to apply for Full Accreditation, by so doing they hope to raise their standards towards greater efficiency, and better care of the patients.

The Nursing Service Department continues to give efficient service to the various departments despite the fact of the nursing shortage of graduate nurses, while the task has been most arduous, service has been given. We wish to commend the Sisters' and Graduate Nurses' for their generosity in taking additional duties to supply for the vacancies in the graduate staff.

The School of Practical Nursing continues to grow, we have been very fortunate in recruiting a larger number of students, after graduation many of these graduate practical nurses' have been employed in the hospital, this has enabled us to give better bedside care to our patients. In the month of January 1952, The National association for the Practical Nurse Education, gave it a Tentative Accreditation, and we are hoping in the near future we shall procure a full National Accreditation.

In the month of February 1952, it was thought advisable to acquire larger space for the Anesthesia Recovery Room, the former one being too inadequate for the volume of patients needing this service, this was granted, Sister Marie R. N., B. S. is in charge of this specialized service, the Doctors have commended service given in this department.

The Dietary Department has completed another successful year. The high standards of the food service to patients and personnel have been maintained, and the training of Dietitians has met the requirements of the American Dietetic Association.

The housekeeping throughout the Hospital and the living quarters of the personnel has been efficiently carried on through the past year. A series of educational conferences to the personnel of this Department have been given, and have proved very beneficial by improving the methods of cleaning and in the morale of the workers.

Respectfully submitted

SISTER ANTONIA
Director of Sisters' Division

NURSING SERVICE DEPARTMENT (Continued)

STUDY OF NURSING FUNCTIONS

As planned in the report for the fiscal period, July 1, 1950 to June 30, 1951, a study of nursing functions in connection with the Department of Nursing has gone forward in the Premature Infant Station, and is under the direction of the Tulane University Urban Life Research Institute. The study got under way, June 15, 1952, and is to continue for the period of one year. The study falls into four different areas:

1. The physical environment and its arrangement.
2. The individual skills, knowledges, etc., possessed and required by the various professional and non-professional personnel working in the nursery.
3. The interpersonal environment—i. e., the way the various personnel interact with each other, e. g., the division of labor and mutual dependencies dictated by the work flow.
4. The organizational and administrative structure which sets the limits within which the nursing services can perform the duties assigned to them.

The methodology includes: (1) Job Evaluation Techniques, involving the use of interviews and direct observation techniques etc.; (2) Job Simplification Studies involving the use of techniques for work analysis, work flow charts, and statistical procedures for evaluating the data obtained; (3) Job Description Studies involving direct observation and interview techniques aimed at discovering the characteristic ways of performing the various jobs, the degree to which variations from this official procedure occurs; (4) Interpersonal Relations—e. g., manner in which the professional and non-professional staff interact one with each other; (5) The Organizational and Administrative Structure involving the investigation of the functional system of authority, etc.; (6) Establishing of Criteria for Evaluating the Data Obtained.

The study is being financed by the Childrens' Bureau, Federal Security Agency, United States Public Health Service at the total cost of nine-thousand five hundred and seventy dollars, (\$9,570.00). The study was conceived to be a necessary project in the Nursing Department in order to work out the problems involved in the Premature Infant Station, in addition to the need for the establishment of new criteria for the care of the Premature Infant especially in view of the later and present concepts now accepted as desirable and necessary in present day nursing circles.

Quarterly reports on the progress of the study will be provided by the Urban Life Research Institute. In addition, a final report setting forth the detailed procedures, methods, and results, of the study will be provided.

Because of the many improvements in the physical facilities at Charity Hospital, the Nursing Department's task of providing nursing care has been greatly lessened. Among these, the renovated Isolation and Neuro-Psychiatric Divisions rank uppermost. The better facilities provided for in the Surgical Recovery Wards, now located in W1106 and W1110, places Charity Hospital's Recovery Unit amongst the finest in this section. The Personnel Health Clinic recently completed and established in C602, allows for the improved functioning of this service in providing health services to the personnel. Two full-time graduate professional nurses, plus a clerical assistant have been employed for this division separating the activity of the out-patient service with the in-service Infirmary care. Better quarters have provided for the Guild Room also, and these facilities are now located on 6th floor.

Respectfully submitted,

SISTER FLORENCE, R. N.

ADVISORY COMMITTEE

This committee, in existence since the fall of 1950, has for its purpose "to further the interests of the School of Nursing through 1) study and interpretation of its needs as an educational institution; 2) promotion of a progressive educational program in keeping with the aim of the school; 3) assistance in attaining and maintaining recognition of the School by agencies of accreditation."

Besides the encouragement, support, and stimulation which the membership provided the administrators of the school, several important accomplishments were realized during the year: 1) securing the appointment of a full time health nurse and a part time secretary for the supervision of the student health program, and 2) a survey of the Charity Hospital School of Nursing Alumnae. Through Dean Roberts, Doctor M. S. Robertson of the Department of Statistics, Louisiana State University has made a survey which is now ready for publication.

The results of the survey besides furnishing an up-to-date census, will furnish valuable data needed for further curriculum planning and for recruitment, in that it will reveal the percent of recruits from neighboring states, the percent who remain in Louisiana following graduation, the type jobs which our graduates hold, and the results being achieved with out present program.

Great credit and appreciation are due these men and women for their interest shown in the school and time given for its welfare.

Aim of the School

The School of Nursing aims to produce professional patient-side nurses by developing the knowledge, skills, and attitudes essential to good nursing care; and to promote the greatest possible development of the individual student as a technically competent professional person and as a human being and citizen by maintaining an educational program and an environment conducive to the promotion of personal integrity, social adjustability and acceptability as well as mental and physical well-being.

Faculty

The several faculty members not having Academic degrees are now attending school part time, and several with basic degrees are also

ADMINISTRATIVE AND TEACHING STAFF (Continued)

furthering their education. Members have been active in professional organization participation; three attended the national convention in Atlantic City; one attended a State Board Conference in Philadelphia; one attended a regional conference on Accreditation in Nashville.

During the past year the turnover among faculty personnel was rather high—opportunity for advancement and better salaries ranked first in reason for leaving.

Admissions and Withdrawals

Admissions to School of Nursing	165	176
Withdrawals from School of Nursing	69	55

State Board of Nurses Examiners Annual Report

Miss Carrie Spurgeon, Educational Supervisor of the State, made her annual visit on February 15, 1952 after which she submitted the following recommendations in part: 1) that evening and night duty for student nurses be reduced to a minimum; 2) that the graduate nurse staff be increased to provide sufficient numbers so that all wards on all shifts be under the supervision of graduate registered nurses; 3) that the facilities of the Clinics be utilized for the education of student nurses.

National Nursing Accrediting Service Survey

This School of Nursing, together with 1103 schools throughout the United States and Territories of Hawaii and Puerto Rico, participated in a survey made by the National Nursing Accrediting Service. The survey consisted of a questionnaire answered by the School and a one day visit of a representative of the NNAS. The Charity Hospital School of Nursing received **temporary accreditation** which is for a period of four years, during which time the school has the opportunity to apply for full accreditation.

Recruitment

During the year active recruitment by means of press and radio publicity, posters, visits to schools, and participation with the State Committee on Careers obtained the following results:

enquiries	1553	accepted applications	200
applications	396	rejected applications	115

ADMINISTRATIVE AND TEACHING STAFF (Continued)

Of the 200 applications accepted only 172 registered.

The high rate of rejection resulted from higher admission standards set with the hope of reducing the number of withdrawals because of failure in theory.

STUDENT WELFARE

Residence—the total residents in the Nurses' Home number 445; of these 294 are Charity students, 145 affiliating students, 3 faculty, one anesthetist, and two hostesses. The number during the year has fluctuated between 537 and the present number.

The home is in good repair on the interior with the exception of the floors, many of which need to be replaced.

The personnel consists of a resident supervisor, six hostesses, five clerks, three switchboard operators, six elevator operators and one guard. The turnover among the hostesses and clerks has been tremendous due partly to the hours of work and partly to salaries.

Health Program—positions for a health nurse and a part time secretary were approved to become effective July 1, 1952 to supervise the student nurse health program. This was necessitated by the high rate of illnesses among students as compared to the National average.

Recreation—program is supervised and directed by a full time faculty member with the help of a half time secretary.

Respectfully submitted,

SISTER PAULINE, R. N.
Director, School of Nursing

Part Time Instructors

SEVEN

At the close of the 1951-52 fiscal period, the total number of classes admitted since the School was opened (March 15, 1950), numbered six. Two hundred and three (203) students have been admitted and seventy-one (71) have graduated. To date all students who completed their course of instruction have passed the State Board administered by the State Board of Practical Nurse Examiners and obtained licenses to practice in the State of Louisiana as Practical nurses.

The Faculty consists of four graduate professional nurses, two Administrative Assistants plus the Director of the School. During the past year, the School received accreditation by the National Association for Practical Nurses Education.

With the present concept of nursing making clear the place of the well prepared practical nurse, the School assumes the responsibility of continuing its efforts to graduate practical nurses in order that adequate nursing care may be provided.

Respectfully submitted,

SISTER FLORENCE, R. N.

ANNUAL REPORT
of the
NURSE AIDE PROGRAM IN THE
NURSING SERVICE DEPARTMENT

July 1, 1951—June 30, 1952

There has been no change in the organization of the nurse aide program during the past year.

The Nursing Service Department is dependent to a great extent on trained nurse aides for the routine nursing care of patients. In order to maintain our staff of 431 nurse aides it is necessary to conduct classes for auxiliary employees continuously. The results of this in-service training program follows:

Number of employees enrolled in the nurse aide course for the year	110
Number of employees who completed the course	85

The employment of medical students as nurse aides on a part-time basis while attending school and full time during vacation was inaugurated in the Operating Room and on the Neuropsychiatric Division. These nurse aides are rendering excellent service in these areas.

SISTER FLORENCE, R. N.

ANNUAL REPORT OF THE DIETARY DEPARTMENT

July 1, 1951—June 30, 1951

ACTIVITIES AND ACCOMPLISHMENTS

Sixteen dietetic interns completed their internship during the year, and one graduate remained as a member of the staff.

The new diet manual was completed and mimeographed copies were distributed to the resident and intern staff. Printed copies will be available in the near future.

The Dietary Department assisted the Tulane Medical staff in studies with various types of patients in connection with radium therapy.

Extensive changes in the arrangement and appearance of existing equipment were made in the Special Diet Kitchen, which has helped to expedite the work in this unit.

More adequate lighting was supplied by the installation of fluorescent lighting fixtures in replacement of incandescent lights. This has been most helpful to the floor pantries, dining rooms, and other inside units without windows and natural light. Freshly painted walls and ceilings gave added brightness to these units.

A hamburger making machine is a valuable addition to the Main Kitchen equipment, it is labor and time saving as well as more sanitary than the hand forming method.

Food service to the Delgado Hospital was discontinued with the demolition of this unit.

The Nutrition Clinic instructed 36,729 patients during the year, a slight increase over the preceding fiscal year.

The patient meals served during the year showed a slight decrease due to the fact that Delgado Hospital was closed during the year. More Infant Formulae were prepared than in any previous year. Comparative figures are listed below:

	1950-1951	1951-1952
Personnel Meals	1,424,750	1,381,930
Patient Meals	2,230,456	2,242,236
Delgado Building Meals (Closed during year)....	117,264	22,202
Total Meals	3,772,470	3,646,368
Special Diets Served	767,892	772,755
Infant Formulae Prepared	81,719	91,671

Respectfully submitted,

SISTER EUPHEMIA, B. S.
Director Dietary Department

ANNUAL REPORT
of the
HOUSEKEEPING DEPARTMENT

July 1, 1951 to June 30, 1952

1. The living quarters for the Student Practical Nurses was changed from the Eve Butterworth Memorial building to the 13th floor of the Main Hospital building; and the doctors were assigned to the rooms in the Eve Butterworth building. The two buildings, adjoining, i. e., the Graduate Nurse Residence and the Eve Butterworth building are now considered as one unit, called the Professional Student Home. The Housekeeping Division has been delegated the supervision of this section.
2. The trunk room on the 14th floor has been converted into an attractive lounge for the use of the doctors.

A surging machine was purchased for the sewing section, and has contributed much toward the efficiency of operation of this division.

One hundred twenty-three new fans were purchased: 60 of these were for the Professional Student Home (male section), and 38 for the Colored T. B. building.

New attractive furniture was purchased for the lobby of the Main Hospital building.

Eight new positions were created in this department: Three Custodial Workers I for the Neuropsychiatric division, one Custodial Worker I for the X-ray Department, 7th floor; three positions (one Matron and two Custodial Workers II) for the Eve Butterworth Memorial building, that the entrance be attended for around-the-clock-watching; and one Matron for night duty on the 13th floor.

One hundred ninety-seven mattresses were renovated the past year. Eleven thousand three hundred eleven new sheets were put into circulation. \$3,240.49 worth of salvage material was sold in the salvage division.

The Northwestern Exterminating Company and National Window Cleaning Company performed their services as per contract.

Respectfully submitted,

SISTER CLARISSE
Director of Housekeeping

ANNUAL REPORT CHEST X-RAY UNIT

July 1, 1951 to June 30, 1952

The Charity Hospital's Mass Chest X-Ray Unit continued to do an excellent job during the fiscal year. U. S. P. H. S. personnel and other physicians who visited our Unit were impressed with the volume of work that was being done. It was pointed out to us by the U. S. P. H. S. physicians that the Charity Hospital's 70 mm Chest X-Ray Unit was doing a greater volume of work than any other similar Unit in America.

In addition to the important work which this Unit was doing in diagnosing tuberculosis and other pulmonary diseases, it was gratifying to note that our new program concerned with the investigation of heart disease was coming along nicely. Patients whose films are found to have abnormal cardiac silhouettes when read by our Tuberculosis Consultant, Dr. Sydney Jacobs, also have their chest films interpreted by a cardiologist, Dr. Louis Levy III, who then determines the advisability of performing complete cardio-vascular studies.

The following is a breakdown of the films read during the fiscal year of 1951-52. We have added the 1949-50 figures for comparison:

	1949-50	1951-52
Shadows very strongly suggesting tuberculosis	60	10
Shadows suspicious of tuberculosis	1,556	2,412
Shadows suggesting other pathology	2,877	4,049
Negative	69,893	63,253
Unsatisfactory	1,426	904
Total	76,012	70,637
(Total Satisfactory)	74,586	69,733

Of the satisfactory 70 mm films, 3.44% were reported as tuberculosis and suspicious of tuberculosis and 5.73% were reported as having shadows suggestive of other pathology.

In addition to the small films taken, 808 large (14 x 17) chest x-ray films were taken of which 35 showed definite evidence of tuberculosis and 210 were interpreted as being suspicious of tuberculosis. (Other pathology, other than tuberculosis, was found in 58 of the large films.)

1951-52 Large Film Breakdown:

Tuberculosis	35
Suspicious of Tuberculosis	210
Other Pathology	58
Negative	504
Unsatisfactory	1
Total	808
Total Satisfactory	807

This is the first year in which we are able to give an Annual Report of the cardiac cases which have been found as a by-product of our Mass Chest X-Ray Survey. As previously explained, patients whose film is interpreted as showing a cardiac abnormality by the physician who reads the chest x-ray films are referred to a cardiologist who then decides whether the abnormality is important enough for the patient to be referred to Charity Hospital's Medicine or Pediatric Clinics for a thorough evaluation.

During the fiscal year (1951-52) 2,330 cases were found to have a film suspicious of heart disease. Since 70,637 small films were taken, 3.29% of these films were found to have some evidence of heart disease. Of this number of suspicious cases referred to our cardiologist, he felt that 311 cases were serious enough to merit an immediate clinic investigation in Charity Hospital's crowded clinics.

Thus 13.34% of the patients whose films were found to have some evidence of cardiac disease by our Tuberculosis Consultant, were found to be important enough to merit immediate attention by our Cardiologist.

The Chest X-Ray Unit of the Charity Hospital is under the supervision of the Tuberculosis Control Section of the Louisiana State Health Department.

ANNUAL REPORT—POLIOMYELITIS CENTER**July 1, 1951 to June 30, 1952**

The Poliomyelitis Center, located in the Lapeyre Miltenberger Home for Convalescents, has a 136-bed capacity and occupies the second, third, fourth and sixth floors. The second floor accommodates patients who are in isolation and/or respirators; it also houses the secretary's, typist's, and medical social worker's office. Third and fourth floors are convalescent wards. On sixth floor, the supervisor's office and lounges for graduate nurses, and white and colored subsidiary workers are located.

From July 1, 1951 to June 30, 1952, 307 patients were admitted to the Poliomyelitis Center. Out of this number, 241 were diagnosed and treated for poliomyelitis. During this period there were 17 bulbar cases, 14 respirator cases and 7 deaths. Two respirator cases were carried over from last year.

The personnel at present is made up of 18 full-time graduate nurses, 2 part-time graduate nurses, 7 graduate practical nurses, 2 student practical nurses, and 28 subsidiary workers.

Children at the Poliomyelitis Center receive instruction from a teacher employed by the Orleans Parish School Board. Monthly birthday parties are sponsored by schools of New Orleans and directed by the teacher. Moving pictures are shown twice weekly.

DOROTHEA ARMBRUSTER, R. N.
Supervisor

ANNUAL REPORT

ELECTROCARDIOGRAPH DEPARTMENT

July 1, 1951 to June 30, 1952

The accompanying report shows the work performed in the Heart Station from July 1, 1951 through June 30, 1952. The figures refer to the number of electrocardiograms taken in each month, and to the number of arterial oxygen saturation studies, cardiac catheterizations, angiocardigrams, and cardiac fluoroscopic examinations.

Many sound tracings of the heart were made during the current year but the breakdown for months is not available although the data was placed in the patients' records.

During the year cardiac clinics were conducted every afternoon, Monday through Friday, in order to maintain a closer check on patients with heart disease. There were also a pediatric cardiac clinic which is conducted every Friday.

Cardiac conferences were held every Thursday from 4:30 to 5:30 P. M.

I. Electrocardiograms

1951		1952	
July	2,270	January	2,331
August	2,289	February	2,059
September	2,024	March	2,408
October	2,558	April	2,350
November	2,208	May	2,415
December	1,777	June	2,182
TOTAL			26,871

II. Arterial oxygen saturation studies	77
III. Cardiac cateterizations	46
IV. Angiocardigrams	20
V. Cardiac fluoroscopic examinations	1,343

Respectfully submitted,
LOUIS LEVY II, M. D.

ANNUAL REPORT

DEPARTMENT OF ELECTROENCEPHALOGRAPHY

BRAIN WAVE LABORATORY

July 1, 1951 to June 30, 1952

During the period covered by the report, a second Electroencephalograph was obtained by the Laboratory and went into operation on the seventeenth of March, 1952. The table below will show a notable increase in recordings done per month, from March through June, 1952:

July	99	January	98
August	97	February	101
September	85	March	135
October	114	April	183
November	101	May	188
December	89	June	169
TOTAL			1,459

OCULAR PALSY STUDY, CASES SURVEYED	34
FETAL HEART RECORDINGS	10
METRAZOL ACTIVATION RECORDINGS	8
AUDITORY RESPONSE RECORDINGS	2
BRAIN TUMOR CORRELATION STUDY, CASES SURVEYED	140
PETIT MAL VARIANT STUDY, COMPLETED WITH REPORT IN PROGRESS	29

During the course of the year, the department was moved from its old fifth floor location to a new laboratory of considerably increased size and located on the fourth floor, center rear. With the acquisition of the new instrument and an additional technician, the department was able to resume providing service to the Outpatient Clinic here at the hospital. In addition, the department has been able to provide the occasionally requested courtesy service to other Louisiana State Charity Hospitals and Clinics.

Respectfully submitted,
H. THARP POSEY, M. D.,
Director

ANNUAL REPORT DEPARTMENT OF ANESTHEOLOGY

July 1, 1951 to June 30, 1952

During the year ending July 1, 1952, 19,009 anesthetics were administered. Under the auspices of Nursing Service, the Recovery Room was moved to the eleventh floor. Not only did this permit the accommodation of more patients, but it became far more accessible to both the surgeons and members of the Anesthesia Department. Two nurse anesthetists are constantly assigned during the entire day to cooperate with the surgical nurses and to care for the postoperative patients from an anesthetic point of view. A resident is also assigned to be available on call and makes periodic rounds.

Dr. Glace Bittenbender, Associate Anesthesiologist, resigned on October 1, 1951 to assume the directorship of the Veterans Administration Hospital Department of Anesthesia in Houston and Associate Professor of Surgery at Baylor. Dr. Margaret Kerr was appointed in his place.

Three residents completed their training on July 1, 1952. During the year 32 graduate nurses completed their training in the School of Anesthesia for Nurses.

An exhibit on Reactions Due to Local Anesthetics, sponsored in conjunction with the Department of Surgery, L. S. U., won a Certificate of Merit at the American Medical Association meeting in Chicago in June.

One dozen oxygen therapy tents for pediatric use were constructed in the shops of the hospital and placed in use. They have been highly satisfactory.

Sincerely yours,

JOHN ADRIANI, M. D., Director
Department of Anesthesia and
Inhalation Therapy

ANNUAL REPORT BLOOD BANK

July 1, 1951 to June 30, 1952

During the year ending July 1, 1952, 23,031 units of blood were collected in the Donor Station. Of these 21,954 were released for transfusion.

Negotiations were carried on with the American Red Cross to accept blood in needy cases from their Bank. Due to the fact that the apparatus used by the Red Cross differs materially from that used here, and changing apparatus used here would be out of the question, arrangements were made to have the Red Cross collect blood into Charity Hospital apparatus at the Blood Center in New Orleans. The arrangement appears satisfactory.

Sincerely yours,

JOHN ADRIANI, M. D.
Director, Blood Bank

ANNUAL REPORT ELECTRON MICROSCOPE DEPARTMENT

July 1, 1951 to June 30, 1952

In the summer of 1951 visits were made to 8 e. m. laboratories on the eastern seaboard. Valuable contacts were made and much useful information obtained.

As an immediate result of this trip, the electron microscope was modernized in accordance with the latest developments of the instrument. A self-biased gun was installed which added greatly to the electron beam intensity. An intermediate lens was also placed in the instrument; this made possible the coverage of a wider range of magnification without the necessity of changing pole pieces.

Separate projects were carried on with:

- 1) Mr. Verne W. Tripp, Southern Regional Research Laboratory, in a further study of cotton fibers.
- 2) Dr. Frank N. Low, L. S. U. Medical School, Department of Anatomy, in studies of the rat lung.
- 3) Dr. C. H. Haddox, L. S. U. Medical School, Department of Surgery, in genetic studies of salivary gland chromosomes of *Drosophila* MeLangster.
- 4) Dr. A. R. Hale, Tulane Medical School, Department of Anatomy, in size determinations of thorium dioxide particles.
- 5) Mr. L. A. Thomas, graduate student in Parasitology, Tulane Medical School, in studies of normal human red blood cells.
- 6) Dr. Margaret Smith, Tulane Medical School, Department of Pediatrics, in a study of the Myxoma virus.

Publications of work done on cotton fibers with the Charity Hospital electron microscope appeared in the December, 1951 issue of the Textile Research Journal.

A demonstration of results in the electron microscope study of rat lung was presented at the national meeting of the American Association of Anatomists in Providence, R. I., in March, 1952. This demonstration created wide interest because of the high calibre of work on a controversial topic.

The facilities for metal shadowcasting, ultra-thin sectioning, and electron microscopy were shown to hundreds of visitors at Charity Hospital during the year.

Respectfully submitted,
C. W. DANIELS

ANNUAL REPORT LUNG STATION July 1, 1951 to June 30, 1952

During the past fiscal year the services of the Lung Station have been broadened by the addition of equipment for the determination of blood-gas tensions and the more accurate determination of respiratory and blood gases. Additional technical help was secured for this purpose. In addition, our work was greatly facilitated by the employment of a student on a part time basis with funds received from the Upjohn Company.

A total of 558 different studies were carried out during the year. A breakdown into the more important categories follows.

It is hoped that during the coming year we will be able to extend our services to the poliomyelitis unit and to start the collection of data on the respiratory volumina of infants and children. No normals have ever been established for these two groups and this information is a serious handicap in the management and treatment of infants and children with any disease which impairs respiration.

Total pulmonary function studies	324
Differential pulmonary function studies	53
Induction of continuous controlled pneumothorax	21
Determination of oxygen consumption	15
Determination of arterial gas tension	8
Gas analysis	8
Bronchial lavage	16
Evaluation of broncho-dilators in asthma	23
Miscellaneous special studies	90
Total	558

Sincerely,

JOHN H. SEABURY, M. D.

E. COOKSEY, Medical Record Librarian

ANNUAL REPORT MEDICAL AND PATIENTS LIBRARY

July 1, 1951 to June 30, 1952

STAFF

There have been no changes in the staff of the library during the period of this report. As in preceding years the volunteers assigned to the library have been most helpful. These volunteers worked a total of 190 hours during the year.

READING ROOM ACTIVITIES

The library continues to enjoy popularity with the professional staffs, both as a source of technical reference material and a place for recreational reading. Increased emphasis has been placed on making the reading room both efficient and pleasant. A desk schedule has now been arranged so that assistance to readers is constantly available. Displays of new books and books on related topics have been continued with success.

WARD ACTIVITIES

Through a schedule of frequent book-truck ward rounds the library continues to help in maintaining in-patient morale. As in past years the library has received many very worthwhile contributions of books from individuals and groups interested in the well-being of our patients. Thousands of magazines have also been given to the library and, in turn, distributed to the patients.

There has been an increase in work with blind and convalescent paralytic patients. Two "talking-book" machines have been in use with records borrowed by the hospital from the New Orleans Public Library, Blind Branch. In this same connection, the library has acquired, through gift, a number of publications in Braille.

Respectfully,

CORINNE L. HINE,
Librarian

ANNUAL REPORT MEDICAL SOCIAL SERVICE DEPARTMENT

July 1, 1951 to June 30, 1952

The Social Service Department offers a professional service to patients, physicians, the hospital administration, and to the community in order to help patients with environmental and personal difficulties related to their illness, recovery and preservation of health.

Social case work services may range from suggestions for meeting a simple problem to helping with such major problems as fear of disfigurement and of death, helping with plans for an uncertain future, with plans for the care of children, and for the care of the old who are sick. The resources of the patient, of his family and of the community are used in helping the patient meet the problem of illness. Illness may result in having to change jobs, to learn a new trade, even to learn to walk again or to talk without a larynx. Patients with cancer, with tuberculosis, with diabetes, and with poliomyelitis and parents with premature babies or children who are ill or who have handicaps are among those who may have difficulty adjusting to and accepting the limitations imposed by illness.

Besides the function of providing service to patients, the Social Service Department must participate in the teaching of other professional personnel in the hospital and in the developing of community resources. The latter is important so that medical care offered by the hospital can be supplemented and can meet the special needs of those who are ill.

This year the number of patients given service dropped 1659. It is believed that this was due to the loss of some of the funds previously available for medical relief needs of patients and because the medical service, the heaviest service, could not be covered fully due to loss of staff. In fact only seven services out of fifteen were covered continuously during the year.

With a staff of 32 case workers, in which there was a turnover of 57%, the department attempted to meet the needs of the 69,650 cases referred by doctors, by social agencies, by the patients themselves or by their relatives and friends. Although it would have been desirable to have a 100% review of patients with tuberculosis, cancer, and of children with certain diagnoses such as tuberculosis and heart disease, an average monthly case count of 181.4 per worker, with the ideal being about 35, prevented this except on the Polio Center and the Premature Unit where the services are more protected. Such case loads meant that most services to patients were brief and that wherever possible agencies in the community were asked to take the major responsibility for service. A total of 2898 cases were referred to other agencies. Of the 69,650 patients given services many needed help in planning for long time chronic illness, others needed help in caring for their children while others needed financial assistance to carry out the doctor's recommendations: 1162 patients were placed either in nursing homes or institutions, or plans for their care at home were completed; 775 children were helped by referral to a social agency for adoption, for placement in a foster home or for better care in their own homes, while 3401 had medical relief needs met. A total of 3519 trips were made by station

wagon to bring patients to clinics or to take them home or to nursing homes or institutions.

Interpretation is a part of all of the services given—interpretation of the patient's illness, its limitations, and his reactions to it to the patient himself, to his family, to other social agencies and to interested individuals in the community. Interpretation was given to approximately 19,699 patients and their families, to social agencies on approximately 8,499 patients and 7,449 interested individuals in the community.

Sixty per cent of the workers' time was spent interviewing patients and their families in the wards, clinics, admitting department or the Social Service office, while 34% was spent writing letters, recording case material and telephoning social agencies, and 6% in supervisory conferences.

In order to help patients carry out the doctors' recommendations which will enable them to be as comfortable and as active as possible with their illness, medication, dressings, appliances may be necessary as may be temporary shelter or transportation to and from New Orleans in order to receive special treatment in the clinic. When patients do not have sufficient funds of their own to meet these expenses hospital funds or private funds from a church or civic organization have been secured. Two families in New Orleans left money to be used to meet the medical relief needs of patients: the Weil Convalescent Fund which can be spent at the rate of \$30 a month and the Stauffer-Eastwick Fund at \$400 a month. A third fund, the Patients' Welfare Fund, amounts to \$100 a month and is allocated as part of the department budget. Jesuit Social Service, Rabbi Feibelman, the Pilot Club, Christ Church Cathedral and several interested individuals have given money over a period of years. This year \$11,051.33 was spent to meet the medical relief needs of 3401 patients: \$5,233.52 provided 2613 patients with medication, \$1,076.68 paid for transportation to and from New Orleans for 319 patients to attend clinic, \$1,054.28 covered temporary maintenance while 129 patients attended clinic, and \$3,690.85 was used for appliances, such as special braces, artificial teeth, artificial eyes, etc. for 340 patients. Of the total 3,401 patients, 2,499 were from Orleans Parish while 902 were from other parishes.

There was a marked decrease in the amount of money spent over last year: \$14,176.25 last year compared to \$11,051.35 this year. There was a corresponding marked decrease in the number of patients helped, 6306 last year compared to 3,401 this year. The reason for the decrease in the use of funds is due not to the fact that there were fewer demands, but because this year Mental Health funds were not available for medical relief, figures for the Insulin Fund were not available for the last nine months of the fiscal year as well as because the Christ Church Cathedral Fund was not available for the last three months of the fiscal year. With the discontinuance of the Christ Church Cathedral Fund the problem of providing medication and expensive appliances for Negro children has been most acute. Since July 1948 a total of \$3,250 was given to this fund by a private individual and 1,522 patients were helped during this period. This shows that the need is too great for private individuals to meet permanently.

In the community staff members served on committees of the Council of Social Agencies and professional organizations as well as on the boards of voluntary health agencies. This included committees interested in improving public health nursing, increasing facilities for the training of practical nurses, developing facilities for the care of convalescent children, especially children with tuberculosis, increasing services to unmarried mothers, improving and safeguarding public assistance

grants, developing care for the chronically ill, especially Negro patients with cancer, developing resources for medical relief.

All of these gaps in the community, especially the lack of facilities for the care of convalescent children, for mentally defective children, for the care of the chronically ill and for medical relief together with the lack of resources for the tuberculous, the mentally ill, for adult convalescents and for temporary shelter affect the work of the department by making it difficult to plan with patients for after care. It is important, therefore, that the department participate with other groups in New Orleans and Louisiana to work toward the development of resources to meet these lacks.

Fifty school of social work students from both Tulane and LSU had field work placements in Social Service: 20 in medical social work and 30 in psychiatric social work; 36 were supervised by the two schools and 14 by the department. Because of insufficient staff it is not possible for Social Service to assume the responsibility for supervision of many students. A total of 1,399 cases were carried by the students.

Besides the school of social work students the staff participated in the teaching of medical students at both Tulane and LSU, of doctors taking post graduate work in public health at Tulane, in the teaching of nurses, both student and post graduate, of dietitians and of practical nurses. This was formal teaching, but there were innumerable informal contacts with all professional personnel connected with the hospital.

The nine Hospital Intake Interviewers who determine eligibility for free medical care in the accident department, wards and clinics interviewed 29,854 patients. As there was a vacancy for over six months, this amounted to approximately 3,512 cases per interviewer. The percentage of ineligible patients was 26 if based on the number of patients interviewed and 4% if related to the number of patients under treatment. The highest percentage of ineligible patients was in the clinics but by far the largest number of ineligible patients interviewed was in the accident department. Since 1942 when the hospital assumed responsibility for determining eligibility for free medical care it has been understood that the program is an attempt at screening only and that to attempt a review of all patients given treatment would require a tremendous increase in staff. In view of the large number of ineligible patients seen in the accident department, which is understandable, it would be desirable to have additional interviewers to assign there. A full time supervisor for the unit is a necessity.

The Cancer Follow-Up Program, established and sponsored by the American Cancer Society and the State Department of Health in 1947, is supervised by the Social Service Department. There are 10,621 patients listed as having cancer of which 2,742 have died, 1,300 are pre-cancerous and 6,579 are alive and have cancer established by biopsy. During the year in an effort to keep these patients reporting regularly for observation and treatment, 3,540 letters were sent the Department of Health, Department of Public Welfare, American Cancer Society and the patients themselves and 3,060 telephone calls were made.

The increase in the minimum salary for Medical Social Workers I and II was a tremendous gain and one which we have been trying to achieve for many years. It is hoped that this will result in reduced turnover in the professional staff. The four new positions in the department: 2 Psychiatric Social Consultants I, a Receptionist for the psychiatric social work unit, and a Typist-Clerk II for the Hospital Intake Unit should increase efficiency. Continuing the services of a psy-

chiatrist as psychiatric case consultant for adult cases and securing a psychiatrist for consultation on cases of children have been of decided benefit to the professional development of the staff. Our close relationship with the medical staff on Psychiatry and Pediatrics has been stimulating. One member of the department who was a member of the board of a social agency in New Orleans was able to attend a national social work meeting because her expenses were paid by the board of that particular agency.

Respectfully submitted,

LOUISE MEYER

Director, Social Service Department

ANNUAL REPORT VOLUNTEER SERVICE

July 1, 1951 to June 30, 1952

Volunteer Service continued to increase during the fiscal year 1951-52. Over 1,554 individual volunteers contributed 31,099 hours to the benefit of patients, staff, the volunteers themselves and community relations.

RECRUITMENT

526 individual new volunteers who came to the hospital to offer service were interviewed and registered. People for special assignments to meet departmental requests were recruited through the Community Volunteer Service, American Red Cross, Radio Spot Announcements, newspaper publicity and appearance of the Coordinator and volunteers on various shows of WDSU-TV. Advisory Committee members also contacted local colleges to recruit students. Many volunteers just came because of interest in the hospital, friends, employees and former patients.

Community organizations whose membership as individuals and in groups contributed outstanding service to the Volunteer Program during the past year include:

- Alpha Beta Sigma Sorority
- American Red Cross
- American Women's Volunteer Service
- Council of Jewish Women
- Community Volunteer Service
- Girl Scouts of America
- Junior League
- Rainbow Girls

ASSIGNMENT

Volunteers have been assigned to a larger variety of jobs in more departments than in any previous year.

Social Service	1551
Telephone Office	89

ORIENTATION AND STIMULATION

During the year two projects were developed by the Volunteer Advisory Committee for orientation of new workers. A training committee outlined a plan consisting of talks by a staff member and a key volunteer and a tour conducted by student nurses. The first orientation classes were held during June for large groups of Teen-Agers starting work. A most attractive and effective pocket-size Volunteer Handbook was devised, illustrated and multigraphed for distribution to volunteers.

The system of awards was continued and during the year over 42 workers received recognition for 200 hours or more of service. The Annual Meeting was held in November and included a movie "V for Volunteer" and presentation of awards by Dr. J. A. Magne, Assistant Clinical Director. A new "Teen Emblem" award for 75 hours of service was approved and awarded to 15 teen-agers in June.

The Volunteer Bulletin was revitalized this year and two issues distributed. It is hoped that it can be continued on a regular bi-monthly basis.

STAFF AND ADVISORY COMMITTEE

Because of the constantly increasing volume of work, employment of an assistant for the Volunteer Office was approved in December 1951. This has greatly facilitated the program of the department.

The former Volunteer Coordinator, Miss Alma Hammett, resigned on May 15, 1952 after three years of considerable achievement. The new Coordinator was employed on recommendation of the Advisory Committee.

Membership on the Advisory Committee has included:

Mrs. Bailey DeBardeleben, Chairman	Mrs. Mims Gage
Mrs. John Hamilton Boyd, Vice- Chairman	Miss Alma Hammett
Mrs. Asahel Cooper, Vice-Chair- man	Mrs. Amy Harrison
Sister Antonio	Mrs. Marigayle Hart
Miss Lucille Baker	Mrs. Leo Haspel
Miss Ann Bilas	Mrs. Corinne Hine
Miss Irma Block	Mrs. Herbert Kenney
Mrs. Harry J. Blumenthal	Mrs. Adrienne Kindlesperger
Mrs. Edgar Boobyer	Mrs. Irwin Kuntz
Mrs. Albert Braunstein	Mrs. Charles Lewis
Mrs. Elliott K. Cowand	Miss Lucille Livaudais
Mrs. Crawford Davidson	Mrs. William E. McCardell
Mrs. Carmen Donaldson	Miss Robertine McClendon
Mrs. Bruce Dunbar	Mrs. Willie Mask
Mrs. Leon Eagle	Mrs. Edward Pons
	Mrs. Stephen Theard
	Mrs. Scott Wilson

SPECIAL PROJECTS AND COMMUNITY CONTACTS

In February the Chairman of the Advisory Committee and the Coordinator attended a meeting of the Women's Auxiliary of the Washington-St. Tammany Charity Hospital at Bogalusa to help them in organizing a volunteer program.

American Womens Volunteer Service developed a new project in April to provide recreation and personal services to patients in the Radiology wards. The "Cheer Ladies" visit the wards weekly and plan special entertainment and a party each month.

The Coordinator attended the Workshop on Theatre Activity sponsored by the L. S. U. Department of Psychiatry and Nursing Education held in May and it is planned to develop a greater use of volunteers in the Neuropsychiatric Unit.

DONATIONS

A variety of donations were received during the year and distributed to different departments, including books, toys, games, scrapbooks, recordings, magazines, favors, Christmas gifts, prizes, plants, entertainment and refreshments. Activities at Christmas time were particularly successful. The W. W. L. toy collection took over the Santa Claus job for all children patients, and other toys, gifts and entertainment were provided by Delta Women's Club, Pygmalion Club, Presbyterian Church Circles, Cub Scout Packs, Girl Scout Troops, W. D. S. U.-TV, Johnson and Johnson, Musicians Union and a group of Loyola students.

Respectfully submitted,

FLORENCE JENNINGS
Coordinator of Volunteers

ANNUAL REPORT PEDIATRICS PLAY PROGRAM

July 1, 1951 to June 30, 1952

VOLUNTEERS

Day Volunteers	137
Night Volunteers	49
Total Volunteers	186

DONATIONS BY MEMBERS OF THE GUILD AND OUTSIDE ORGANIZATIONS

July 1, 1951 to June 30, 1952

- 28 complete handmade layettes.
- Books and magazines for the patients.
- 14 large boxes of used clothes for the patients.
- 25 pairs of new and old shoes.
- 2 pairs of crutches.
- Scrap books, picture puzzles, games and toys for the children.
- At Christmas, 330 dolls were donated and given to the children in memory of Mrs. C. C. Blancq and Mrs. Lewis Lay.
- Two television sets were given—one for the patients in the Contagious Ward and one for the Polio Unit.

Mrs. Walter Grunning is Chairman of this Committee, also a member of the Guild.

A Christmas party was given by Mrs. Walter Grunning for the children on the ninth floor in the Contagious Wards, and in the Polio Unit. The little girls received dolls and the boys, toys. Ice cream, candy, and cake were served to all.

A Christmas party was given to the patients in the Dibert Building by the Magnolia Branch of the Louisiana Sunshine Society of which Mrs. Charles Richard is the President. The members of the Magnolia Branch are also members of the Guild.

250 pairs of socks, shaving cream, and playing cards were distributed to the patients, each one receiving a pair of socks, shaving cream, and a deck of cards, fruit, candy, ice cream, and cake.

A beautiful doll was given to a Tubercular patient.

Four pounds of coffee were given weekly to the patients in the Dibert and in the Breaux Buildings. The coffee fund is under the direction of Mrs. Joseph E. Snakenberg. Funds for this purpose are raised by giving parties.

300 Easter baskets were donated and distributed to the patients in the white and in the colored Tubercular buildings, also to the Radiology patients. The entertainment, gifts and refreshments were greatly appreciated and enjoyed by all.

NAMES OF GROUPS ASSISTING IN GUILD WORK

Enrollment	Boys	Girls	Total
1. Total enrolled during session	63	43	106
2. Average daily enrollment	9	5	14

Class For Pre-School Tuberculous Patients

Instructor: Melanie Wilson, B. A.

This class was established on April 14, 1952. It was set up in the Contagious Unit for the children in the age groups of two to five years. Because these children are deprived of normal environment, the class supplements the hospital routine by providing these youngsters with activities that are as near normal as possible under the circumstances. It is hoped that the experiences they acquire in the group situation in the school room will enable them to adjust better when they return home.

Respectfully submitted,

SELMA K. FASTING, M. A., Instructor
Class For Convalescents
